DETAILED ACTION

Double Patenting

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 1, 9 and 17 (and dependent claims) provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1, 16 and 23 of copending Application No. 10-293772. This is a provisional double patenting rejection since the conflicting claims have not in fact been patented.

→ The applicant must either cancel these claims (and all other dependent claims) and/or amend them in such a fashion that they no longer recite the same inventive concept. The primary examiner notes that while the wording is different, eg. this application recites "testing a cellular network" while the co-pending application recites "measuring a signal", they both operatively test/measure a network condition and then report said condition back to a telematics call center.

→ No further consideration will be given to the claims until the examiner receives back a response/amendment to this office action, hence no art rejection is attached.
